

ELECTRICITY GENERATION MIX IN 2025

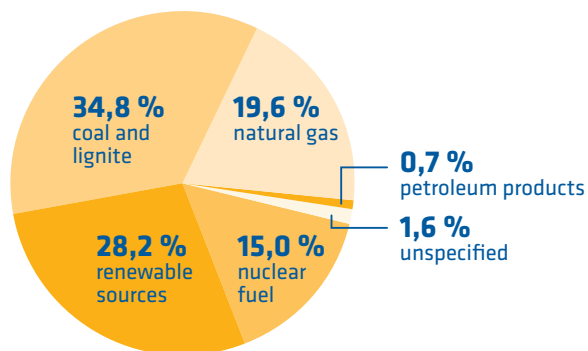

Supplier: ECE d.o.o., Vrunčeva ulica 2a, 3000 Celje

Year: 2025

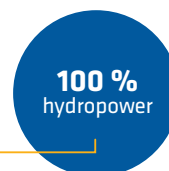

Year 2025	Share of total electricity supplied
Fossil fuels:	56,74%
coal and lignite	34,84%
natural gas	19,60%
petroleum products	0,74%
unspecified	1,56%
Nuclear fuel:	15,02%
Renewable sources:	28,24%
hydropower	11,73%
wind	0,76%
solar	14,82%
geothermal	0,00%
biomass	0,91%
unspecified	0,02%
Total:	100,00%

CO ₂ emissions and radioactive waste per kWh of electricity generated in 2025	
CO ₂ emissions	0,463 kg/kWh
Radioactive waste	256,00 µg/kWh

Electricity Generation Mix in 2025

Electricity generation mix for customers supplied with electricity backed by Guarantees of Origin.

Sources of information on environmental impacts:
www.okolje.info, www.agen-rs.si, kazalci.arso.gov.si, www.ece.si

Note: The calculation of the electricity generation mix for 2025, as well as CO₂ emissions and radioactive waste generated per kWh, was based on the total residual mix of generation sources for 2025 published by the Energy Agency (www.agen-rs.si on 23 June 2026) and on ECE Guarantees of Origin for 2025.
